Investments in general, and derivatives in particular, involve numerous risks, including, among others, market, counterparty default and liquidity risk. Trading in options involves additional risks and is not suitable for all investors. An option may become worthless by its expiration date, as it is a depreciating asset. Option ownership could result in significant loss or gain, especially for options of unhedged positions. Prior to buying or selling an option, investors must review the "Characteristics and Risks of Standardized Options" at <http://www.optionsclearing.com/about/publications/character-risks.jsp> or from your SG representative. Analysis of option trading strategies does not consider the cost of commissions. Supporting documentation for options trading strategies is available upon request.

You should contact your usual SG salespersons to execute transactions with a SG Group entity authorised in its home jurisdiction, unless applicable law permits otherwise.

YOUTRACK

YouTrack is a service developed and owned by SG which enables you, on behalf of the company you represent (the “Client”), to manage, modify and monitor on-line portfolios of assets which determine the performance of related financial instruments (each a “Portfolio”).

For the purposes of this Important Notice:

Dedicated Representative means the person appointed by the Client as its duly authorised representative to manage the user profiles within the Client who are authorised to use YouTrack on behalf of the Client.

Relevant Advisory Agreement means a Risk Weighting Agreement, an Index Advisory Agreement or other similar agreement (however described) between the Client and SG whereby the Client is entitled, under certain conditions, to propose, or make, modifications in the Portfolio. In case of conflict or inconsistency between the Relevant Advisory Agreement and this Important Notice, this Important Notice will prevail.

In YouTrack, you can:

- (i) view the assets composing Portfolios (“Component Assets”) and the parameters of the Portfolio’s strategy (“Strategy Parameters”);
- (ii) propose modifications in the Portfolio and/or to the Strategy Parameters in accordance with the terms of the Relevant Advisory Agreement; and
- (iii) download reports on various items relevant to the management of the Portfolio.

In YouTrack, modifications in the Portfolio will be carried out as follows:

(i) you can submit a request to change: (a) the composition of the Portfolio and/or (b) the Strategy Parameters (the “**Modification Request**”);

(ii) Once the Modification Request is submitted, SG will confirm whether the Modification Request is accepted or rejected on the basis of pre-determined eligibility criteria; and

(iii) If accepted, the modification in the Portfolio and/or to the Strategy parameters will be effective on such date and at such time specified in the Modification Requests, save in case of occurrence of circumstances preventing such modification to occur.

The Portfolio modification procedure set out above supersedes any alternative procedure set out in the Relevant Advisory Agreement, save that (i) in case YouTrack is affected by a breakdown or other problem such that it is not possible to post Modification Requests, or (ii) in such other circumstances as SG may reasonably determine from time to time upon written notice to the Client, the Client may use the process set out in the Relevant Advisory Agreement.

YouTrack enables the Client to download a series of reports to monitor the performance of the Portfolio (e.g. performance reports, charts and statistics, past modifications of the Portfolio), historical data since the Client joined YouTrack.

Post-trade services

DPS

DPS is a service developed and owned by SG which enables you, on behalf of the company you represent (the “Client”), to obtain on-line information related to your DPS Transactions with SG in the form of electronic reports. These electronic reports (each a “**Transaction Supplement**”) include the trade details applicable to each DPS Transaction entered into pursuant to certain Master Confirmation Agreement for Dynamic Portfolio Swap Transactions executed by you and SG.

In this Important Notice, except as so far as the context otherwise requires, capitalized words and expressions shall have the same meaning as in the Master Confirmation Agreement between you and SG.

The terms of each Transaction Supplement should be independently verified by you and your agents. **THESE TERMS SHALL BE DEEMED CONCLUSIVE IF NOT OBJECTED TO IN WRITING PRIOR TO THE TIMELY CONFIRMATION DEADLINE FOLLOWING THE EFFECTIVE DATE OF DELIVERY OF THE TRANSACTION SUPPLEMENT, IN ACCORDANCE WITH APPLICABLE LAWS AND REGULATIONS.** In the alternative, you should contact your SG representative to make comments or to raise questions about the terms of the Confirmation. Neither SG nor any of its affiliates is acting as your advisor, agent, or fiduciary of any kind with respect to DPS Transactions into which you enter with SG. SG is acting solely in the capacity of a contractual counterparty. Before entering into any transaction, you should independently determine, without reliance upon SG, the potential economic risks and merits of the transaction and whether it is appropriate for you given your objectives, experience, financial and operational resources, and other relevant circumstances. You should determine the legal, tax and accounting characterizations and consequences of the transaction with such advisers as you deem necessary to assist you in making these determinations.

MYHEDGE

MyHedge is a service developed and owned by SG which enables you, on behalf of the company you represent (the “Client”), to:

(i) view on-line (a) foreign exchange hedging transactions entered into between the Client and SG and/or, if applicable, the Client and other financial institutions (the “Hedging Portfolio”), and (b) the impacts of simulations of future variations in exchange rates on the Hedging Portfolio (the “View” service); and

(ii) obtain on-line proposals from SG to enter into new hedging transactions in view of your foreign exchange exposure based on the information you or other representatives of the Client have uploaded in MyHedge (the “Live Advisory” service).

The **View service** is intended to help you review the Hedging Portfolio. It does not constitute, and under no circumstances should be considered, in whole or in part, as an offer by SG to buy or sell, a solicitation, an advice or a recommendation in respect of (i) liquidating, unwinding or terminating any hedging transaction prior to its scheduled maturity; or (ii) entering into new hedging transactions.

In the View service, simulations of future variations of exchange rates are of two types: those which are pre-determined by SG

and those which are determined by the Client. Those which are pre-determined by SG do not constitute, and under no circumstances should be considered, to be forecasts in respect of the relevant exchange rate. In respect of those determined by the Client, they are to be determined in the Client's sole responsibility. The actual variations of exchange rates may be very different from the simulations of future variation of exchange rates determined by SG, you or the Client.

In the absence of any action on your part, the sole hedging transactions taken into account by MyHedge are those entered into between the Client and SG. However, MyHedge offers the possibility to upload on the Website or the API hedging transactions entered into with between the Client and other financial institutions (the "**Third Hedging Transactions**"). Only the economic data of the Third Hedging Transactions will be required for these purposes, the provision of the counterparty's name being optional. You acknowledge that (i) you provide this information in your sole responsibility and in compliance with your legal, regulatory and contractual obligations, in particular in relation to the confidentiality of such information; (ii) any erroneous or incomplete entry of the Third Hedging Transactions' economic data could result in a misleading viewing of the Hedging Portfolio.

Live Advisory service (i) allows SG to submit hedging transactions' proposals to the Client directly through MyHedge; and (ii) simulates the impacts which the entry into such hedging transactions would have on the Hedging Portfolio. You acknowledge that any erroneous or incomplete entry of the Third Hedging Transactions' economic data could result in such hedging transactions' proposals being inconsistent with your exposure to foreign exchange risk. You should consult your own fiscal, financial, accounting and any other competent professionals you deem appropriate to determine whether the hedging transactions' proposals submitted to the Client by SG are relevant and appropriate in light of the Client's overall financial situation.

While all reasonable care has been taken in the preparation of MyHedge to give an accurate account of the Hedging Portfolio and its variation on the basis of different possible scenarii, SG expressly disclaims any responsibility in relation to: (i) your use of MyHedge ; (ii) any errors or omissions in the computer processing such information and the impact of such information in relation to the Client ; and (iii) any financial or other consequences arising from the viewing of the Hedging Portfolio.

SG Markets Billing: mandate for self-billing

You, on behalf of the company you represent (the “Client”), authorize and instruct SG to issue, in the name and on behalf of the Client, invoices (including revised invoices) related to distribution agreements entered into between SG and the Client and whereby the Client agrees to distribute or place Financial Products issued by SG or to introduce clients or transactions to SG (each a “**Distribution Agreement**”).

With regards to the common interest and the shared benefits which result from the implementation of such self-billing mandate, no remuneration shall be required by SG to the Client for issuing invoices under SG Markets Billing.

SG shall determine the amount of the invoices, issue them and make them available to the Client in SG Markets Billing. Invoices shall be mentioned as “invoice issued by SG in the name and on behalf of the Client”. Client shall validate invoices in SG Markets Billing or refuse them at the latest three calendar days (in Paris) following their reception in SG Markets Billing (unless mentioned otherwise in the Distribution Agreement). For each invoice, Client shall verify the information related to, including but not limited, the accuracy of the amount, the VAT information if applicable, its identification information, the compliance of the invoice with local laws and regulations or other requirements of its tax authorities applicable at any time to this self-billing mandate and to SG Markets Billing (the “Applicable Rules”).

If you (on behalf of the Client you represent) have not expressly approved or refused invoices in SG Markets Billing during the requested period, you shall be deemed as having approved them.

Once validated by you (on behalf of the Client you represent), a copy of the final invoice shall be made available to you in SG Markets Billing and the original version shall be stored by SG. If you (on behalf of the Client you represent) do not have access to the final invoice within two calendar days (in Paris) following your approval, you shall immediately request a copy of the final invoice to SG.

Any invoice issued pursuant to the foregoing process shall be considered definitive and final.

If, for any reason, any such final invoice should subsequently be modified, it will be the Client’s responsibility to issue a revised invoice and send it to SG for prior approval, pursuant to the foregoing process.

Any delay in payment by SG of the Client’s invoices referenced in a Distribution Agreement shall commence on the date on which SG issues the final invoice.

You (on behalf of the Client you represent) undertake to provide SG, in a timely manner, with all necessary information and support reasonably required by SG to issue the invoices in the name and on behalf of the Client, any modification in the invoice’s parts mentioning the Client’s company.

The Client shall remain liable for all its legal and regulatory obligations in respect of any taxes due pursuant to each invoice, and specifically with regard to VAT. The Client shall communicate to its competent tax authorities, any information related to this self-billing mandate, as requested by the Applicable Rules. In case the benefit is subject to VAT, the Client undertakes, if it is the person liable for the payment of the VAT, to pay to its tax authorities any applicable tax due pursuant to each invoice issued in its name and on its behalf. Subject to the Applicable Rules, SG shall not be liable for such payment.

Post Trade Services

This module enables Clients to obtain on-line direct access to:

- a dashboard offering real time access to multi asset transactions, positions and balance of accounts,
- various reports, and
- various account statements.

Allocation

This module provides SG listed derivatives clearing Clients with a graphical user interface depicting a summary of post-trade matching of exchange-traded derivatives for the current day allowing Clients to view, for example, trades by broker, by exchange and lots by contract. Further, this module provides Clients with (i) the ability to instruct allocations of the day's unallocated trades, and (ii) a functionality to allocate trades to pre-approved SG accounts and to allocate trades to be given-up to external brokers.

Access to this module is permissioned as an add-on role and is not provided as a default functionality to all Clients.

This module is only provided to SG full-service Clients (SG executed and cleared) and execution only Clients.

Matching

This module is a post-trade reconciling tool allowing clearing Clients across asset classes to reconcile their top day transactions and prior day position and commission records against SG's back office systems. Clients' files can be submitted for reconciliation directly through the UI or via SFTP processing. This module notifies Clients of unmatched records that either have yet to be posted to SG or require additional mapping.

Access to this module is permissioned as an add-on role and is not provided as a default functionality to all Clients.

FI Clearing Reconciliation Service

This module, especially permissioned for SGAS Clients with respect to done-away buy/sell transactions only, allows fixed income clearing Clients to submit their FI trade activity for clearing into SG's back office system for reconciliation and settlement facilitation purposes.

Locate

This module connects agency equity clearing Clients to the internal SG tool (EFTS) for stock search/locate. Clients enter stock symbols they are interested in shorting to determine whether shares are available to borrow. This is indicative of whether Clients will be able to book and clear a short trade in their account with SG.

Access to this module is permissioned as an add-on role and is not provided as a default functionality to all Clients.

What if

This module allows agency cleared swap Clients the ability to simulate potential margin requirements associated with cleared swap activity.

Cash Management

This module is a tool that automates message flow from agency Clients to SG client services with respect to wire processing and balance transfers across asset classes. Clients are able to enter requests for action (wire in/out, receipt, balance transfer) directly into the SG internal workflow for processing in accordance with standard operational procedures (manual validation and approvals based on thresholds) replacing the need for manual re-entry of Clients requests into the workflow. This module does not automate the relevant payments/transfers, but instead automates the instruction messaging flow.

Access to this module is permissioned as an add-on role and is not provided as a default functionality to all Clients.
